Ref 23/00046/MFULF

My husband and I wish to register our objection to the application for solar and battery storage at Eden Farm Malton.

Our grounds for objection are as follows:-

- the removal of prime agricultural land from production when as a nation we should be more self sufficient in food production.
- solar panels could be made compulsory on all new builds - a perfect opportunity that is constantly ignored by local authorities/government.
- depriving farmers of a living and depriving them of something they are capable/good at doing
- by removing prime agricultural land from production this results in the likely hood of having to import more products thus adding to climate change

P.T.O.

- it is not a valid reason to say that there is a convenient sub-station nearby.

Yours faithfully,

CHRIS and SHEILA CRONE
